Derivatives

Intuition about derivatives

$$\begin{array}{ll} \rightarrow a = 2 & f(a) = 6 \\ a = 2.001 & f(a) = 6.003 \end{array}$$

slope (derivative) of $f(a)$
at $a=2$ is 3

→ $a = 5$ $f(a) = 15$
 $a = 5.001$ $f(a) = 15.003$
 slope at $a = 5$ is also 3

$\frac{df(a)}{da} = 3 = \frac{d}{d\frac{1}{\pi}} f(a)$
